

2017 Après

Vineyard & Winemaking Notes

We have been growing the Vignoles grape for many years for its uniquely vibrant citrus and tropical fruit aromas. The fungus *botrytis*, nick-named by the French the "noble rot", grows on most grapes, but it <u>loves</u> Vignoles. *Botrytis* dessicates some of the berries, thereby intensifying the flavors. This process, crucial to the famed *Sauternes* dessert wines, is likewise one of the secrets to our Après. About 15% of the Vignoles grapes in this 2017 vintage were "happily" botrytisized.
